

TESL CANADA
Teachers of English as a Second Language - Canada

October 13, 2021

Dear TESL Canada Members,

Thank you to all those who completed the **COVID Effects on TTPs** survey. This survey was aimed at eliciting current and future TESOL Teacher Training Program needs. We first advised you of the opportunity to participate in this survey in August 2021, and then again at the beginning of September. The survey was open to all TESL/TESOL programs across Canada, whether their program is TESL Canada recognized or not. Fifty-three unique participants completed the survey, which is a great participation rate.

Please see the survey results linked below. We trust you will find the results informative and helpful in your strategic planning.
